SUBJECT INDEX

A

Acidosis, indo-1 effects of, 1646
Actin
  bundle arrays of, 1976
  structural connectivity in, 1957
Actin compliance, 2131
Actin-crosslinking protein, filament movement regulation by, 973
Actin-encapsulating liposome, shape change of, 922
Actin filament, in contracting muscle, 2411, 2422
βActin-TCP-1 complex, reversible formation of, 364
Acyl chain order, in mixed-chain phosphatidylcholines, 197
Adenosine diphosphate, platelet subpopulation activation and, 2060
Adenosine triphosphate, caged, muscle fiber relaxation kinetics and, 2436
Adsorption anisotropy kinetics, of molecular complexes, 2184
Alamethicin, molecular flexibility of, 1861
Alcohol, interdigitation induced by, in distearoylphosphatidylcholine, 1888
Alkanethiol biomimetic membrane, insulating properties of, 1126
Amine blockage
  of batrachotoxin-activated sodium channel closure, 1040
  of cardiac sodium channels, 1015
γAminobutyric acid, efficacy of, 183
Amyloid-β, aggregation of, 1216
Amyloid-β peptide, fibril size and flexibility of, 1238
Amyloid-β protein, ion channel structure of, 2137
Anionic channel, double-barreled, in hepatic rough endoplasmic reticulum, 590
Antibiotic, polyene, cation conductance and efflux by, 143
4-AP, potassium channel block and gating by, 130
Apyrase, muscle fiber relaxation kinetics and, 2436
Arachidonic acid, gap junction channel regulation by, 1052
Atomic force microscopy
  DNA motion and enzymatic degradation and, 2454
  of epithelial cells, 36
  of *Escherichia coli* porin surface topograph, 2394
  tapping mode of, for living cells, 1749
Automaton model, of muscle thin filament regulation, 11
Axon, myelinated, ion channels in, gadolinium and, 71

B

Bacteriochlorophyll *a monomers*, femtosecond spectroscopy of, 2002
Bacteriophage, filamentous, coaxial helix model for, 2205
Bacteriorhodopsin
  inverse proton translocation in, 1682
  M-intermediate substates of, 1173
  photocycle of, 855, 1179, 1187
  retinal photoisomerization process in, pH and, 2008
  second harmonic generation from, 1155
  structural changes in, pH and, 1706
Batrachotoxin-activated sodium channel
  closure of, amine blockade inhibition of, 1040
  tetracaine block of, 1851
  transcainide block of, 1028
Bending modulus, measurement of, 720
Biochemical reaction networks, 560
2,3-Bisphosphoglycerate, hemoglobin binding to, in erythrocytes, 2096
Book reviews, 478, 937, 1358, 1788, 2558
Books received, 2559
Brain, sodium channel in, saxitoxin/tetrodotoxin binding site in, 1007

C

Calcium
  buffering and diffusion of, 4
  caged, photolysis of, chromaffin cell secretory response after, 2546
  in cardiac myocytes, 457
  cross-bridge kinetics and, 1925
  cystolic buffering of, in cardiac myocytes, 1775
  diffusion and oscillations of, rapid buffers and, 447
  Fura-2 and, in rods, 2076
  intracellular
    ciliary beating and, 377
    Fura-2 AM measurement of, 476
    spatial non-uniformities in, 1942
    waves of, 2191
  muscle fiber isometric tension redevelopment rate and, 1994
  muscle fiber shortening velocity and, 1984
  release of, 7
    chloride-dependent, in sarcomplasmic reticulum, 751
  in restricted spaces, 262
Calcium channel
  activation of, calcium store depletion and, 177
  in cardiac sarcoplasmic reticulum, ryanodine sensitivity in, 2280
  gating of, in cardiac sarcoplasmic reticulum, 1484
  potentiation of, by niflumic, flufenamic, and mefenamic acids, 2272
  of skeletal muscle, selectivity of, 641
  ventricular, colchicine and taxol and, 2296
Calcium gradient, pulsed laser imaging of, 505
Calcium pump, cardiac, 190
Calcium release channel, of sarcoplasmic reticulum, phosphorylation and, 1823
Calmodulin binding sites, on ryanodine receptor, of skeletal muscle, 2286
Capacitance, of membrane, 42
Carbonmonoxy myoglobin, distal residue-CO interaction in, 2236
Carbonyl myoglobin, hydrated, FTIR spectra of, 862
Carbonyl stretching band, in 1,2-diacylglycerolipid bilayer, 2367
Cardiac cell, sodium channels in, 153, 161
Cardiac muscle, activation kinetics of, 1933
Cardiac myocyte
  calcium dynamics in, 457, 2223
  cystolic calcium buffering in, 1775
  intracellular calcium spatial non-uniformities in, 1942
Cardiac myofibril, passive and active tension in, 782
Cardiac sarcoplasmic reticulum, calcium channel gating in, 1484
Cardiac system, *See* Heart
Cation
  conductance and efflux of, polyene antibiotic induction of, 143
  permeability of, in red cell, membrane stress and, 1876
Cell, viscoelasticity of, 1749
Cell-cell electrofusion, mechanically facilitated, 1574
Cell detachment, kinetics of, 2522
Cell dynamics, slow, time-lapse atomic force microscopy of, 929
Cell flux, in parallel plate flow chamber, 889
Cell pellet
  electrical properties and porosity of, 418
  osmotic properties and electroporation of, 427
Centrophilin/nuclear mitotic apparatus protein, coiled-coil structure of, 1203
Cesium, potassium ion channel block by, 120
Channel-forming peptide, energy barriers and, 1429
Charge displacement, in potassium channel gating, 1455
Chloride, calcium release and, in sarcomplasmic reticulum, 751

Chloride channel, of cystic fibrosis transmembrane conductance regulator, phosphate and, 1867
Chloroplast enzyme, light-activated, 29
Cholesterol/DMPC membrane
intramolecular dynamics of, 902
temperature change in, 728
Choline head group, Langevin dynamics of, 713
Chromaffin cell, secretory response of, after photolysis of caged calcium, 2546
Chromatin, erythrocyte, dynamic structure of, 504
Chymotrypsin, cardiac sodium channel gating and, 161
Ciliary beating
intracellular calcium and, 377
three-dimensional, 381
Colchicine, ventricular calcium channel and, 2296
Confocal microscopy
in cell biology, 481
diffusion measurement by, 948
Connexin peptides, gap junction channel formation and, 1816
Corneal scar tissue, structure of, 1743
Creatine kinase, in muscle, 1912
Cross-bridge cycle, in muscle fiber
kinetics and thermodynamics of, 1655
mathematical description of, program for, 1669
Cross-bridge kinetics, calcium and, 1925
Crystal growth, in hydrated methemoglobin, 1724
Crystallization, of protein, microhydrodynamic simulation of, 1801
Cysteine, redox-sensitive, in light modulation, 29
Cystic fibrosis transmembrane conductance regulator, chloride channel of, phosphate and, 1867
Cytochalasin D, liposome shape change and, 922
Cytochrome aa, near infrared changes of, during potentiometric titration, 2493
Cytochrome c
membrane location of, 737
solution conformation of, 1207
Cytoskeletal integrin interaction, in fibroblasts, 461
Cytoskeletal protein, 1790
reversible binding kinetics of, 1324
Cytoskeleton, erythrocyte, simulation of, 521

D

Dark adaptation, of bacteriorhodopsin, 1187
Deoxyribonucleic acid
hydrodynamic radius of, cations and, 304
motion and enzymatic degradation of, in atomic force microscope, 2454
photoelectron imaging of, 2041
spermidine-condensed, liquid crystalline phase in, 1387
supercoiled
$MnCl_2$ and, 1678
salt and, 2146
Deoxyribonucleic acid polymer, localized hydrogen bond defects in, 2448
Deoxyribonucleic acid sequence, coding regions of, 64
Deterministic variability, versus stochastic variability, 671, 684
1,2-Diacylglycerolipid bilayer, carbonyl stretching band in, 2367
Diffusion, measurement of, 948
Dihydropyridine receptor, junctional tetrad restoration by, 793
Dimyristoylphosphatidylcholine, pyridine interactions with, 238
Dimyristoylphosphatidylcholine/cholesterol membrane
intramolecular dynamics of, 902
temperature change in, 728
Dioleoylphosphatidylethanolamine, hexagonal-lamellar-hexagonal transition in, 1603
Dioleoylphosphatidylethanolamine/dioleoylphosphatidylcholine membrane, intramolecular dynamics of, 914
Dioxolane-linked gramicidin A channel, gating in, 1370
Dipalmitoylphosphatidylcholine, Langevin dynamics of, 713
Dipalmitoylphosphatidylcholine/ethanol mixture, colloidal and phase behavior of, 1067
Dipyrenyl lipid, fluorescent, intramolecular excimer kinetics of, 902, 914
Distearoylphosphatidylcholine, alcohol-induced interdigitation in, 1888
Dityrosine, in yeast acscospores, time-resolved fluorescence studies of, 309
DMPC, *See* Dimyristoylphosphatidylcholine
Drift, shape function of, 1252

E

Electricity, in biology and medicine, 480
Electric signal, randomly fluctuating, recognition and processing of, 1247
Electrofusion, polyethylene glycol-mediated, of erythrocytes, 2361
Electrogenic ion transport, impedance of, 1582
Electroporation
of photosynthetic membrane, 1060
of planar bilayer membranes, 42
Electroreceptor
ion channels and, 1525
sensitivity of, 1367, 1525
Energy barrier, channel-forming peptides and, 1429
Enzymatic chemical oscillation, substrate inhibition kinetics in, 1414
Enzymes, molecular dynamic simulations of, 548
Eosinophil peroxidase, resonance Raman microspectroscopy of, 436
Epithelial cell, atomic force microscopy of, 36
Epithelium, electroreception in, 1525
Erythrocyte
cation permeability of, membrane stress and, 1876
hemoglobin binding to 2,3-bisphosphoglycerate in, 2096
polyethylene glycol-mediated electrofusion of, 2361
surface shape of, membrane skeletal agents and, 1896
Erythrocyte chromatin, dynamic structure of, 504
Erythrocyte cytoskeleton, simulation of, 521
Erythrocyte submembrane, cytoskeletal protein binding kinetics at, 1324
Ethanol/dipalmitoylphosphatidylcholine mixture, colloidal and phase behavior of, 1067
Europium ion chelate complex, time-resolved delayed luminescence image microscopy using, 957
Excitation energy transfer, in *Heliobacillus mobilis* membrane, 2479
Expectation-maximization algorithm, in quantal analysis, 656

F

Fab-fluorescein complex, structure of, 2167
Fibroblast, integrin-cytoskeletal interactions in, 461
Filament
movement of, regulation of, 973
thin, of muscle
automaton model of, 11
regulatory switch of, 273
Flight muscle
relaxed, three-dimensional reconstruction of, 1620
structural alterations of, 1149
Flufenamic acid, calcium channel potentiation by, 2272

Fluorescence, lifetime distributions of, for tryptophan protein, 2013
Fluorescence polarization, of molecular complexes, 2184
Fura-2, calcium and, in rods, 2076

G

Gadolinium, ion channels and, 71, 84
Gap junction channel
dynamic communication, 1335
effects of arachidonic acid, oleic acid, and halothane on, 1052
formation of, connexin peptides and, 1816
subconductance states of, 113, 491
voltage-dependent gating of, 613
Glucolipid, sugar-methylated, phase behavior in, 1090
G-protein, activation dynamics of, 1345
G-protein cascade, simulation of, 1439
Gramicidin A channel
dioxolane-linked, gating in, 1370
magnetic fields and, 1474
sodium ion binding in, 1495
Growth, patterns of, 479
Guanylyl-uridine, stacking-unstacking of, 812

H

Halide anions, binding of, to roflamycoin channel, 2265
Halothane, gap junction channel regulation by, 1052
Harmonic, second, from bacteriorhodopsin, 1155
Heart *See also* Cardiac entries
calcium pump in, 190
sarcoplasmic reticulum of, calcium channel in
gating of, 1484
ryanodine sensitivity in, 2280
sodium channels in, amine blockers of, 1015
transmembrane voltage in, multiple site optical recording of, 1301
Helical head, sperm with, movement of, 1767
Helical peptide, collisions of, in membranes, 172
Helix
alpha, amino terminus of, electrostatic effects at, 2251
coaxial, electrostatic resonance model for, 2205
hydrophobic, flexibility in, 1861
Helix bundles, parallel, ion channels and, 1501
Hemoglobin
affinity of, for 2,3-bisphosphoglycerate, 2096
homodimeric components of, dynamic properties of, 1713
Hexagonal-lamellar-hexagonal transition, in dioleoylphosphatidylethanolamine, 1603
Hippocampal slice, stochastic versus deterministic variability in, 684
Hofmeister effect, in ion transport, 2265
Hydration forces, of phosphatidylcholine lipid bilayers, 1882
HYDRO computer program, 530
Hydrogen bond, defects of, in DNA polymer, 2448
Hydrophobic helix, flexibility in, 1861

I

Ice
in hydrated methemoglobin, 1724
in lamellar structures, 706
Immunoglobulin G, adsorption of, 1316
Impedance, of electrogenic ion transport, 1582
Indo-1, protein and acidosis effects on, 1646
Influenza hemagglutinin, form and fusogenic activity of, pH and, 2355
Inositol trisphosphate, ventral photoreceptor response to, 1161
Integrin-cytoskeletal interaction, in fibroblasts, 461
Interdependence principle, in water transport, 1464
Interdigitation, alcohol-induced, in distearoylphosphatidylcholine, 1888
Ion channel *See also* specific element
of amyloid β-protein, 2137
conductance alterations in, membrane potential pulse and, 603
electroreception and, 1525
gadolinium and, 71, 84
interacting, properties of, 634
modeling state-dependent inactivation of, 515
multiple conductance levels of, three-halves rule of, 647
parallel helix bindings and, 1501
permeation and recovery of, 1806
of skeletal muscle ryanodine receptor, 1834
in *Xenopus* oocytes, 395
Ion release, in purple membrane, 2490
Ion transport
Hofmeister effect in, 2265
impedance of, 1582
pathway for, formation of, 2261
in voltage-gated potassium channel, 2316

J

Junctional tetrad, restoration of, by dihydropyridine receptor cDNA, 793

K

Kinesin molecule, single, force exerted by, 766
Kinetic rate constants, estimation of, 1393
KINSIM kinetics simulation program, 1260

L

β-Lactoglobulin, cold and heat denaturation of, 356
Lamellar gel, lamellar liquid phase transition, in phosphatidylethanolamine, 293
Lamellar structure, ice in, 706
Letters to the editor, 475, 2120
Light, modulation of, mechanism of, 29
Light harvesting complex II, fluorescence and absorption of, 837
Light quenching, theory of, 2024
Lipid
bilayers of
chain packing and conformational statistics of, 963
in phosphatidylcholine, hydration forces of, 1882
spin-labeled, proteins and, spin exchange between, 737
surfactant, of lung, conformation transition of, 1107
under power pressure, 9
Lipid-polymer films, composite, on substrates, 217
Lipid-protein interaction, in spin-labeled membrane, 2326
Liposome
actin-encapsulating, shape change of, 922
applications of, 1358
Liquid crystalline phase, in spermidine-condensed DNA, 1387
Liver
rough endoplasmic reticulum in, double-barreled anion channel from, 590
sodium in, double-quantum-filtered NMR of, 369
Liver mitochondria, optical properties of, 2501
Lung
surface biophysics and, 1080
surfactant lipids of, conformation transition of, 1107

M

Macromolecule, hydrodynamic properties of, computer program for, 530
Magnetic field, gramicidin A channel and, 1474
Magnetism, in biology and medicine, 480
MARCKS protein, *See* Myristoylated alanine-rich C kinase substrate (MARCKS) protein
Medial giant nerve fiber, impedance of, 692
Mefenamic acid, calcium channel potentiation by, 2272
Membrane
cross-talk between, 6
dipole potential of, 208
excitation energy transfer in, 2479
head group and chain behavior in, 2345
helical peptide collisions in, 172
MK-801 interaction with, 2376
of myristoylated peptides, 105
planar bilayer, electroporation of, 42
polyacid solubilization of, 1101
polypeptide structure in, 1368
potential pulse of, ion channel conductance and, 603
purple, ion release in, 2490
spin-labeled, lipid-protein interactions in, 2326
Membrane cortex, neutrophil deformation and, 696
Membrane-interactive properties, of signal seqences, 1534
Membrane junction, self-assembly of, 746
Membrane skeletal agents, cell fusion and, 1896
Membrane stress, red cell cation permeability and, 1876
Methemoglobin, hydrated, crystal growth in, 1724
Methionine, in bacteriorhodpsin dark adaptation, 1187
Micelle-vesicle transition, in lecithin-bile salt solution, 1733
Microphotolysis, diffusion measurement by, 948
M-intermediate, in bacteriorhodopsin, 1173
Mitochondria, of liver, optical properties of, 2501
MK-801, membrane interaction with, 2376
Molecular evolution, simulated, 2120
Monopentadecenoin, in water, 1595
Motion, directed, tracking measurements of, 2110
Motor molecule
functional multiplicity of, 1134
motility assays for, 938
Motor protein, 1790
Multiphasic kinetics, in stopped-flow experiments, 2511
Muscle
cardiac, activation kinetics of, 1933
contracting
actin and myosin filaments in, 2411, 2422
calcium concentration and, 1925
creatine kinase activity in, 1912
for flight, *See* Flight muscle
skeletal, *See* Skeletal muscle
striated, unfixed cryosections of, 1612
thin filaments of
automaton model of, 11
regulatory switch of, 273
Muscle fiber
axis of, spin label alignment with, 1634
cross-bridge cycle in
kinetics and thermodynamics of, 1655
mathematical description of, program for, 1669
force of, lattice spacing and, 1965
isometric tension redevelopment rate in, calcium and, 1994
relaxation of
kinetics of, 2436
myosin orientation in, 1141
shortening velocity of, calcium and, 1984
Myelinated axon, ion channels in, gadolinium and, 71
Myocyte, cardiac
calcium dynamics in, 457, 2223
cystolic calcium buffering in, 1775
intracellular calcium spatial non-uniformities in, 1942
Myofibril
cardiac, passive and active tension in, 782
rotational dynamics of, 250
of skeletal muscle, ATPase activity in, pH and, 2404
Myoglobin
carbonmonoxy, distal residue-CO interaction in, 2236
carbonyl, hydrated, FTIR spectra of, 862
Myosin, in muscle fiber, spin label of, 1634
Myosin filament, in contracting muscle, 2411, 2422
Myosin orientation, in muscle fiber relaxation, 1141
Myristoylated alanine-rich C kinase substrate (MARCKS) protein, basic peptides and, phosphorylation and, 227
Myristoylated peptide, membrane interaction of, 104

N

Na, K-ATPase, randomly fluctuating electric signals by, 1247
Nerve fiber, medial giant, impedance of, 692
Neuromodulin, peptide membrane association and, phosphorylation and, 227
Neuronal circuit, stochastic versus deterministic variability in, 671, 684
Neurotransmitter, discharge of, in fast synapses, 966
Neutrophil
deformation of, membrane cortex and, 696
non-Markov movement in, 2535
New and notable, 3, 491, 947, 1367, 2131
Niflumic acid, calcium channel potentiation by, 2272
Nitroxide free radical clearance, simultaneous 280 MHz EPR imaging during, 1274
Nuclear mitotic apparatus protein/centrophilin, coiled-coil structure of, 1203
Nucleic acid
conformational transitions of, 825
vibrational circular dichroism of, 2460

O

Oleic acid, gap junction channel regulation by, 1052
Optical microscopy, 1791
Optical recording, multiple site, of transmembrane voltage, in heart, 1301
Oxygen concentration, measurement of, with microspheres, 896

P

Particle, single fluorescent, three-dimensional tracking of, 1291
Patch clamp analysis, multichannel, 1393
Peptide
basic, phosphorylation and, 227
channel-forming, energy barriers and, 1429
colied-coil, thermodynamic models of, 349
helical, collisions of, in membranes, 172
monolayers of, at air/water interface, FTIR of, 402
myristoylated, membrane interaction of, 104
Peptide channel, voltage-gated, molecular flexibility of, 1861
Peptide-lipid interaction, thermodynamics of, 1546
Phosphate, and chloride channel of cystic fibrosis transmembrane conductance regulator, 1867
Phosphatidylcholine
lipid bilayers of, hydration forces of, 1882
mixed-chain

acyl chain order in, 197
polyunsaturated, calorimetry of, 2387
Phosphatidylethanolamine, barotropic phase transition kinetics of, 293
Phosphatidylserine/phosphatidylcholine mixture, fluid, phase separation in, 1906
Phospholamban phosphorylation, 3
Phospholipase A, secretory, electrostatics of, 493
Phospholipid, from *Escherichia coli*, surface topographs of, 2394
Phospholipid bilayer, supported
assembly of, 1113
insulating properties of, 1126
Phospholipid vesicle, α-sarcin and, 1117
Phosphorescence decay
analysis of, 2048
in protein, 1192
Photocycle
of bacteriorhodopsin, 855, 1179, 1187
of photoactive yellow protein, 1691
Photoreceptor, ventral, inositol trisphosphate response in, 1161
Photosynthetic bacterial reaction center, 939
Photosynthetic membrane, electroporation of, 1060
Photosystem I, birefringence and dichroism of, 411
Photosystem II, temperature-dependent quantum yields of, 318
Phototransduction, G-protein cascade of, simulation of, 1439
Platelet activation
ADP and, 2060
quantal, aggregation and, 2069
Platelet transport model, of drift, 1252
Polyacid, membrane solubilization by, 1101
Polyene antibiotic, cation conductance and efflux by, 143
Polymer-lipid film, composite, on substrates, 217
Polypeptide, in membrane, structure of, 1368
Pore, single-file, transport properties of, 996
Pore-pore separation, of membrane, 42
Porin, from *Escherichia coli*, surface topographs of, 2394
Potassium channel
cesium ion block of, 120
gating of, 91
and 4-AP block, 130
charge displacements in, 1455
inactivation of, ion permeation and recovery from, 1806
state-dependent inactivation of, 579
voltage-gated, ion conduction and drug binding sites in, 2316
Protein
actin-crosslinking, filament movement regulation by, 973
cell surface, fluorescence energy transfer in, 861
crystallization of, microhydrodynamic simulation of, 1801
cytoskeletal, 1790
reversible binding kinetics of, 1324
IgG adsorption and, 1316
indo-1 effects of, 1646
luminescent spectroscopy of, 478
monolayers of, vectorially oriented, 336
motion of, in different envrionments, 548
motor, 1790
phosphorescence decay in, 1192
signal sequences of, membrane-interactive properties of, 1534
spin-labeled, lipids and, spin exchange between, 737
yellow, photoactive, photocycle of, 1691
Prothrombin fragment 1, diffusion of, 1754
Protonated Schiff base, pKa of, 848
Pulmonary vascular control, 1789
Pyridine, DMPC interactions with, 238

Q

Quantal release rate, at rod synapse, 57
Quantum analysis
expectation-maximization algorithm in, 656
model discrimination in, 532
Quantum yield, temperature-dependent, of photosystem II, 318

R

Receptor clustering, 1280
Red cell, *See* Erythrocyte
Redox-sensitive cysteine, in light modulation, 29
Resonance Raman microspectroscopy, 5
of eosinophil peroxidase, 436
Retina, photoisomerization of, in bacteriorhodopsin, 2008
Ribonuclease A-uridine vanadate complex, histamine positions in, 331
Ribonucleic acid polymerase, transcript elongation by, tethered particle motion study of, 2468
Rod, fura-2 in, calcium concentration and, 2976
Rod synapse, quantal release rate at, 57
Roflamycoin channel, halide anion binding to, 2265
Rough endoplasmic reticulum, hepatic, double-barreled anion channel from, 590
Ryanodine receptor, of skeletal muscle
calmodulin binding sites on, 2286
ion channels of, 1834
pH regulation of, 626

S

Salt, supercoiled DNA and, 2146
α-Sarcin, phospholipid vesicles and, 1117
Sarcoplasmic reticulum
cardiac, calcium channel in
gating of, 1484
ryanodine sensitivity in, 2280
chloride-dependent calcium release in, 751
of skeletal muscle, calcium release channel of, phosphorylation and, 1823
Saxitoxin, voltage-dependent sodium channel block by, 2305
Saxitoxin/tetrodotoxin binding site, on sodium channel, 1007
Scanning force microscopy, of IgG adsorption, 1316
Scanning tunneling microscopy, 937
Scar tissue, corneal, structure of, 1743
Schiff base, protonated, pKa of, 848
Signal peptide-lipid interaction, thermodynamics of, 1546
Signal sequence, membrane-interactive properties of, 1534
Single-channel data, jumps in, detection of, 1404
Skeletal muscle
calcium channels of
phosphorylation and, 1823
selectivity of, 641
filament lengths of, 283
myofibrillar ATPase activity in, pH and, 2404
polyene antibiotic-induced cation conduction and efflux in, 143
ryanodine receptor of
calmodulin binding sites on, 2286
ion channels of, 1834
pH regulation of, 626
sarcoplasmic reticulum of, chloride-dependent calcium release in, 751
Skeletal muscle fiber, relaxation kinetics in, 2436
Sodium
binding of, in gramicidin A channel, 1495
hepatic, double-quantum-filtered NMR of, 369
Sodium-calcium exchanger, voltage-dependent conformational currents of, 1516
Sodium channel
batrachotoxin-activated
closure of, amine inhibition of, 1040

tetracaine block of, 1851
transcainide block of, 1028
cardiac, amine blockers of, 1015
in cardiac cell, 153, 161
saxitoxin/tetrodotoxin binding site on, 1007
voltage-dependent, saxitoxin and tetrodotoxin block of, 2305
Sperm, with helical head, movement of, 1767
Spermidine-condensed DNA, liquid crystalline phase in, 1387
Spin exchange, between spin-labeled lipids and proteins, 737
Spinal cord reflex, stochastic versus deterministic variability in, 671
Spin label, alignment of, with muscle fiber axis, 1634
Stochastic variability, versus deterministic variability, 671, 684
Stopped-flow experiment, multiphasic kinetics in, 2511
Stratum corneum, intercellular membranes of, 1562
Subconductance event, detection of, 1404
Substrate inhibition kinetics, in enzymatic chemical oscillations, 1414
Sulfur-bearing molecule, biologically addressable monolayer structure of, 1229
Synapses, fast, neurotransmitter discharge in, 966
Synaptic transmission analysis
expectation-maximization algorithm in, 656
model discrimination in, 532

T

Taxol, ventricular calcium channel and, 2296
TCP-1 cytoplasmic chaperonin, β-actin interaction with, 364
Tetracaine, charged, batrachotoxin-modified sodium channel blockage by, 1851
Tetrad, junctional, restoration of, by dihydropyridine receptor cDNA, 793
Tetrahymena, geotaxis of, 2090
Tetrodotoxin, voltage-dependent sodium channel block by, 2305
Three halves rule, of ion channel conductance, 647
Time-resolved delayed luminescence image microscopy, using europium ion chelate complex, 957
Tracking, three-dimensional, of single fluorescent particle, 1291
Transcainide, batrachotoxin-activated sodium channel block by, 1028
Transcript elongation, by RNA polymerase, tethered particle motion study of, 2468
Transient state kinetics, tutorial of, 1260
Tryptophan, internal motion of, 874
Tryptophan protein, fluorescence lifetime distributions for, 2013

U

Uridine vanadate-RNAse A complex, histamine positions in, 331

V

Ventral photoreceptor, inositol trisphosphate response of, 1161
Ventricle cell, calcium channel in, colchicine and taxol and, 2296
Vesicle
micelle transition to, in lecithin-bile salt solution, 1733
of phospholipid, α-sarcin and, 1117
Vesicle formation, by extrusion, 475
Vesicle membrane, bending modulus of, 720
Viruses, photoelectron imaging of, 2041
Viscoelasticity, of living cells, 1749
Visual pigment, protonated Schiff base of, pKa of, 848
Voltage
potassium channel dependence on, ion conduction and drug binding sites and, 2316
sodium-calcium conformational current dependence on, 1516
sodium channel dependence on, saxitoxin and tetrodotoxin block of, 2305
transmembrane, multiple site optical recording of, 1301

W

Water
clustering of, in hydrated methemoglobin, 1724
deuterated, hydration force paramaters and, 1882
monopentadecenoin in, 1594
transport of, independence principle in, 1464
Wing beat signal, Fourier analysis of, 1149

Y

Yeast ascospore, dityrosine in, time-resolved fluorescence studies of, 309
